Summary

Computer Science undergraduate with hands-on experience in full-stack web development using Java, JavaScript, SQL, HTML, CSS, React.js, and Spring Boot. Skilled in building responsive front-end interfaces, RESTful APIs, and backend services, with a strong foundation in object-oriented programming, data structures, algorithms, and database management (MySQL, PostgreSQL). Experienced in ability to design scalable, real-world applications.

Skills

Programming Languages: Java, JavaScript, SQL

Frontend Development: HTML5, CSS3, React.js, Responsive Web Design

Backend & APIs: Spring Boot, RESTful APIs,

Databases: MySQL, PostgreSQL, Database Management

Core Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms, AWS Cloud

Tools & Practices: Git, GitHub, VS Code, Eclipse, Agile Development

Experience

Intern – Infosys

July - August 2026

Project: Web Platform for Carbon Footprint Monitoring and Sustainability Analytics

- Built a web-based sustainability platform to track and monitor carbon footprint data, translating raw metrics into actionable environmental insights.
- Implementing data analytics and visualization features that enable users to interpret trends and reduce their environmental impact.
- Built secure REST APIs and database services using Spring Boot and MySQL for seamless data management.

Projects

AI-Based Library Management System

Java, Spring Boot, React.js, MySQL, Machine Learning,

Razorpay API

- Architected a full-stack library management system with Spring Boot and React.js to automate book borrowing, tracking, and fine management workflows.
- Engineered an NLP-powered chatbot supporting English and Hindi queries for real-time borrowing status, book summaries, and personalized recommendations.
- Integrated the Razorpay payment gateway for secure, automated fine payments, backed by an autonomous fine-calculation engine.

Smart Agro-Defence Intelligence & Monitoring System (SADIMS)

Java, Spring Boot, PostgreSQL,

Python, Flask, Machine Learning

- Developed an agricultural monitoring platform with Spring Boot and PostgreSQL to manage farmer registrations, crop records, disease tracking, and weather data.
- Deployed a Python Flask microservice for machine learning inference, detecting plant diseases and generating confidence-scored diagnostic reports.
- Created a recommendation engine using an agricultural knowledge base to deliver treatment guidance and preventive crop-health measures.

Achievements & Certifications

- upGrad Certification – Introduction To Spring Core And MVC
- Software Engineering Job Simulation, Forage – completed practical engineering tasks
- IBM SkillsBuild Certification – Artificial Intelligence Fundamentals
- upGrad Certification – Core Java Basic
- upGrad Certification – JavaScript from Scratch

Education

Bachelor of Technology, Computer Science and Engineering

2023 – 2027

Parul University, Vadodara, Gujarat, India | CGPA: 7.63 / 10

Class XII, Bihar School Examination Board (BSEB)

2023

Percentage: 62.4%

Class X, Bihar School Examination Board (BSEB)

2021

Percentage: 71.2%
